**Food Ingredients Europe 2019**

- Floorplan: 25
- Opening times: 25
At Food Ingredients Europe 2019, innovative companies from Côte d’Ivoire, Ecuador, Egypt, Ethiopia, Ghana, Kosovo, Pakistan, Sri Lanka and Ukraine present their diverse range of natural ingredients.

IPD connects European importers with these carefully evaluated exporters.

IPD is the German initiative for import promotion.

Our goal is the sustainable and well-structured import promotion of special products from selected developing countries and emerging nations – under compliance with high quality, social and environmental standards.

We introduce exporters from our partner countries to the EU market and assist them in setting up trading relations.

For European importers, IPD opens up new supply sources in the partner countries and supports them in the complex purchasing process.

Reduce your initiation, negotiation and control costs with IPD.

We have the contacts, information and communication channels to your new suppliers.

Our services for you are neutral and free of charge.

The companies from the IPD partner countries were carefully selected and prepared for export to the EU market.

On the following pages you will find detailed information about the IPD exporters. We establish direct contact to these new suppliers and organise b2b meetings at the trade fair.

Get in touch with us!

The IPD is an initiative of the Federation of German Wholesale, Foreign Trade and Services (BGA) and sequa, the development organisation and partner of German business. We are funded by the Federal Ministry for Economic Cooperation and Development (BMZ).

IPD partners

IPD works with a network of international organisations in Europe and our partner countries. Thus we efficiently pool information and know-how.

This enables us to link existing import and export promotion measures and carry out their strategic further development. Our partnerships always make it possible for us to match all services of IPD to the needs of importers and exporters exactly and then carry out our services optimally at any place.

Companies marked in green offer the product in organic quality.
Microfertile was founded in 2018 in Côte d’Ivoire. Microfertile’s mission is to create jobs in the rural areas and to assist particularly young people in their development. For the first time, through the activities of Microfertile, farmers’ wives are strongly incorporated in the value chain of cocoa and thus improving the income of the producers’ families. Microfertile sets up agricultural processing plants in order to add value to the local production of cocoa and to provide a chocolate selection made in Côte d’Ivoire to the national and international market.

The company participates in trade shows to present the ingredients of the Ivorian rural population processed with great care for quality and traceability. 2/3 of product sales revenue goes to rural women’s associations to finance their activities. A very small quantity of the raw material is already organic certified, but most of the products are produced naturally without an organic certification yet.

**PRODUCTS & QUANTITIES PER YEAR**

- Cocoa powder / 2,000 t
- Cocoa butter / 1,000 t
- Cocoa liquor / 1,000 t
- Cashews coated with chocolate / 500 t
- Virgin coconut oil / 800 t
- Shea butter / 100 t

**CERTIFICATIONS**

- ORGANIC (EU) for small quantities of the processed raw material

**SOURCE OF RAW MATERIAL**

- Farmer cooperatives

Scoopega Scoops was founded in 2017 as a co-operative committed to consumers, conservation and the community. The cooperative includes hundreds of smallholder farmers and collaborators in the producing region of Gagnoa in the center-west of Côte d’Ivoire. They produce, buy and sell quality natural agri-products according to their high ethical standards.

Scoopega Scoops aims at developing a sustainable agribusiness model through the empowerment of smallholder farmers in the value chain, while contributing to human and economic development, gender equality, agricultural and environmental sustainability, traceability and quality service. Such notions are, indeed, critical to the establishment of a fair and sustainable agricultural industry that will benefit all stakeholders. That is why the objective is to create future wealth opportunities for upcoming generations by introducing clients to the secrets of quality products of Scoopega Scoops.

**PRODUCTS & QUANTITIES PER YEAR**
- Cocoa beans / 3,000 t
- Coffee beans / 1,000 t

Zalli Foods is an agro processing company that develops and produces nutritious snacks made from African fruits and superfoods. The company was launched in early 2017 with its line of Toasted Coconut Chips under the SOA | Snacks of Africa consumer brand. It also produces high quality dried fruits (mango and pineapple) for bulk and wholesale distribution.

The company stands on 3 pillars of impact:

+ Women & youth empowerment: Zalli Foods is woman owned and operated with 70% of its workforce being women and 100% under the age of 30.
+ Stable market access for smallholder farmers (80% of Ghana’s coconuts are produced by smallholders).
+ Contribution towards the diversification of Ghana’s industrial sector beyond Gold and Cocoa production.

PRODUCTS & QUANTITIES PER YEAR
+ Toasted coconut chips / 21t
+ Dried mango / 10t

Agroproduct is one of the leading companies in Kosovo for the collection, cultivation, processing and production of medicinal and aromatic plants, forest fruits and mushrooms. Since 2002, the company has grown constantly and can now provide 28 cultivated and 85 collected species. It is the only large-scale producer of cultivated organic products in Kosovo, and furthermore has the certificate for collected species as well. Agroproduct has developed an excellent infrastructure including a 7,000 m² facility building, modern driers and 57 employees who are well trained in product safety. In addition, 45 out-growers and over 3,200 collectors benefit directly through the collaboration with the company.

The Ceyshine Corporation has three Trade Mark registered products named Vitalia Superfoods®, Ceydex® and MyBonBon®. The company has a reputation as a producer of high quality organic essence based food ingredients which they export to Japan and the global market. They purchase the raw materials directly from local organic farmers thereby creating sustainable income for many farming families in Sri Lanka.

The Ceyshine Corporation has been utilizing novel value addition green technologies that have never been found in the natural raw material based industry before, such as target specific isolation (TSI) method using green cold-technology for isolation of essence molecules and oils from agriculture products, such as tea, coconut, ginger, tamarind, turmeric, cinnamon, etc. for the production of ingredients that can be used in flavor, medicinal food and cosmetic industries. The products are 100% organic and the company does not use chemicals or preservatives.

**PRODUCTS & QUANTITIES PER YEAR**
- Natural powders and colours / 20 t

Asian Agro Products was established in 1922 with the motive of exporting high quality desiccated coconut products to the global market. Asian Agro Products introduces “NUTRIKOKOS” to the consumer with the intention of bringing a wide range of high quality coconut products.

The company promotes organic farming to reduce the use of toxic chemicals and enhance human health and consumer satisfaction. They use the best technology available to get the best products and also strive hard to protect the environment and the well being of their employees. Therefore their focus lies as well on the social responsibility to build a better society for everyone.

The Phytopharm-trade is a bright representative of a new generation of Ukrainian enterprises, of which the main principles are high ethical and moral principles of business conduct. The company was founded in 2013 and is located in Ivano-Frankivsk, 60 km from the Ukrainian Carpathians. Main importing countries are Germany, the Czech Republic, Poland and Belarus.

Phytopharm-trade’s activities comprise harvesting, drying, processing and storage of wild and cultivated medicinal plants, fruits and seeds. Among the engagement in the development of a sustainable wild collection, Phytopharm-trade has 20 permanent employees.

Today’s direction of development of the company is organic production, which involves not only naturalness in everything, but also the concern for nature, people and the surrounding world, which is confirmed by the certificate UA-BIO-108 Organic Standard/Ukraine.
